"Where Better Nursery Stock Is Grown"

FOREWORD.

For several years past we have had the privilege of furnishing nursery stock through County Agents and Agricultural Teachers, to thousands of farmers and home-owners. This method of distribution is becoming more and more popular, because the Agent and Teacher are in position to follow up the sale of plants and trees with practical advice to the buyer as to the scientific methods of planting and cultivating.

We have just completed a new and modern frost-proof storage and packing house, and this will enable us to give even better service than in previous seasons.

We feel that we have the good-will of each County Agent and Agricultural teacher who has ordered from us in past seasons. We realize that they are a connecting link between us and their clients, and that we must do our full duty in order that the clients may receive just treatment.

A word as to prices: In marketing nursery stock it is necessary that quantity governs price; and in order that there be no discrimination between small buyers and large quantity buyers, we price most items as "Each," "Per 10," "Per 100," and in some instances, "Per 1000," making the differential such as is justified by varying quantities, and thus enabling the small buyer to own his trees or plants on a comparative basis with the buyer who uses large quantities.

Varieties: Several new varieties are included in this issue of our list. We try to keep abreast of the times in varieties, but do not include new ones until it has been determined that there is merit to them. The descriptions given are accurate, and our variety list is so complete that perfectly satisfactory material may be found in it to completely furnish any home grounds or orchard.

Prices shown in the list are F. O. B. our nursery, but we make no extra charge for boxing or packing. However, freight, express, and postage are to be paid by customer. If small shipment is ordered to come by mail, kindly include enough with your purchase check to fully cover postage. If too much is sent, the excess amount will be refunded.

Terms: Cash with order unless you desire shipment sent C. O. D. and even then a part of the purchase price should be sent with order. We strongly recommend your sending payment in full saving C. O. D. Fee and the charge for returning remittance to us.

Substitutions: Usually we will be able to supply any article listed by us true-to-name; but should it happen that we are sold out of any item ordered we will use all care to give you a satisfactory substitute, and label it as sent. On large quantity orders, or orders for commercial orchards, we will not substitute at all unless we first have your consent.

Special Discount: If your order amounts to \$50.00 or more, we allow a straight discount of 5 percent from list. This discount makes it desirable to send "club orders"—two or three, or several persons sending their orders together to be included in one shipment.

We shall be glad to serve you often during the season.

CUMBERLAND VALLEY NURSERIES, Inc.
McMinnville, Tenn.

FRUITS, ETC.

We can furnish most of the varieties in fruit trees and berry plants that are grown in this section. We grow some varieties that are not shown in this list and we solicit your orders for your full needs. If not able to furnish exactly, we will send one nearest like it unless you specify that we shall not substitute. This has reference to small assorted orders—on commercial orders WE DO NOT SUBSTITUTE.

APPLE—Whips.

		Each	Per 10	Per 100	Per 1000
2 to 3 feet	-----	.20	\$1.75	\$15.00	\$125.00
3 to 4 feet	-----	.25	2.25	20.00	175.00
4 to 5 feet	-----	.30	2.75	25.00	225.00

*Anoka trees are 5 cents higher per tree in all sizes.

APPLE—Two year branched.

3 to 4 feet	-----	.35	3.25	30.00
4 to 5 feet	-----	.40	3.75	35.00
5 to 6 feet	-----	.45	4.25	40.00

Varieties:

Early or Summer Apples:

Yellow Transparent. Earliest variety of apple. Fruits pale yellow, slightly acid, and markets in good condition. Trees bear young.

Duchess. A late summer variety which thrives anywhere and bears well flavored fruit. An all purpose apple.

Maiden Blush. A late summer apple. Possibly the best commercial variety for cooking in its season.

Early Harvest. One of the earliest summer apples. Trees very vigorous and productive. Fruit tender with yellow skin. Good for eating and cooking.

Red June. An early summer apple, producing medium sized red fruit of distinctive flavor. No home orchard is complete without it.

Hackworth. A southern variety of distinctive merit. Should have a place in all family orchards in Dixie.

Late Fall Apples:

Grimes Golden. A favorite yellow apple. Fruit medium, uniform, yellow. Flesh tender and crisp, slightly acid. Stores well.

Kinnard's Choice. Originated in Tennessee. One of the best all purpose red apples. Similar in color to Winesap, but ripens earlier. Appreciated wherever known.

Northern Spy. A hardy healthy apple that is very productive and stores well. Brings top market price.

Northwestern Greening. A fall apple in the South, but ripening later in northern localities where it is hardy and very productive. Fruit pale, waxy yellow, sometimes faintly blushed.

Red Delicious. A late fall variety that is well known commercially. Trees very vigorous and bears larger and better fruits with age. Fruit oblong, nearly covered with dark red. Flesh firm, juicy and very distinct aromatic flavor.

Tolman Sweet. The leading sweet apple. Trees hardy, long-lived and bear early. Fruit pale yellow, sometimes blushed. Flesh firm, white and sweet.

Wealthy. Another fall apple in the South, which is hardy in the North. Fruit of good appearance, shaded to dark red. Flesh tender sub-acid. Especially adapted to sandy soils.

Yellow Delicious. An all-purpose apple with almost every good quality. Trees vigorous and productive. Fruit uniform in size, coloring to a good yellow color. Flavor very distinctive and pleasing.

Dark Red Delicious. The same description as for the Red Delicious applies to this very popular new variety; and in addition to having all the desirable qualities of the original Delicious, it also has the advantage of an exquisite deep red color covering the entire fruit. One of the best additions to the list of apple varieties since the original Delicious.

*Anoka. Called the "Old Folks Apple" because it comes into bearing at an early age, often having some fruit the second year after planting. It is very resistant to cold temperatures, bears heavily. Fruit is of good size, colored red with yellow streaks, ripens in mid-summer, and is fine for cooking. The tree does not grow so large as some other varieties, and is therefore good for planting in the yard, if other space is not available.

York Imperial. A late fall or early winter variety, planted largely in the Virginias and adjoining states. Fruits keep and ship exceptionally well.

Winter Apples:

Baldwin. Probably the most extensively grown of any winter apple in the Eastern states. Fruit uniform in shape, yellow blushed and mottled with red. Flesh crisp, tender and juicy.

Cortland. Very similar to McIntosh, but if possible an improvement. Fruit bright deep red in color. Flesh snow white, firm, crisp and tender.

Jonathan. Everybody places this variety among the best in both appearance and quality. **Medium** sized fruits with brilliant red skins. Flesh nearly white, crisp and tender with a distinctly pleasant aroma.

Mammoth Black Twig. A seeding of Winesap, growing more vigorously. Bears large fruits of good quality.

Rome Beauty. An excellent market variety. Fruit uniform and very attractive. Planted largely in commercial orchards, but fits well into the home orchard.

Red Rome Beauty. Quite an improvement over the Rome Beauty as far as color is concerned. Quality practically the same.

Stayman Winesap. Larger than the common Winesap. Fruit dark, rich red, indistinctly striped. Keeps well and can be used in every way. One of the best.

Winesap. Thrives everywhere planted. Fruit excellent. Keeps well and is good commercially.

Winter Banana. Trees very hardy, vigorous and fruitful. Fruit clear, pale yellow, with a delicate blush. Flavor rich, mixture of sweet and sour.

Yates. Very popular in the South, especially in Georgia. A heavy bearer and good keeper. Fruit will often stay on trees until near Christmas if not picked.

Crab Apples:

Transcendent. An early ripening variety, ripening in August. Color yellow, overspread with bright red. Flesh very crisp and tender.

Whitney. Ripens in late August. Has all the good qualities that an early Crab Apple can have. Very tender and juicy. Not excessively acid when ripe.

PEAR—Whips.

		Each	Per 10	Per 100
2 to	3 feet_____	.25	\$2.25	\$20.00
3 to	4 feet_____	.30	2.75	25.00

PEAR TREES—Two year branched.

3 to	4 feet_____	.40	3.75	35.00
4 to	5 feet_____	.45	4.25	40.00
5 to	6 feet_____	.50	4.75	45.00

Varieties:

Bartlett. Grown profitably in every pear growing section in America. Trees vigorous and bear young.

Fruits large and long with clear yellow color when mature. Flesh fine grained and juicy.

Garber. An earlier pear than Kieffer. Hardy north and south. A very vigorous grower, producing fruits suitable for culinary purposes.

Kieffer. Grown largely for culinary purposes. Grows to large size. Fruit long and heavy. Flesh coarse and not so sweet. Largely planted for canning.

Seckel. Very vigorous and productive. Fruits reddish-brown of medium size. One of the best all purpose pears.

PLUM.

	Each	Per 10	Per 100
2 to 3 feet_____	.25	\$2.25	\$20.00
3 to 4 feet_____	.30	2.75	25.00
4 to 5 feet_____	.35	3.25	30.00

Varieties:

Abundance. Best known Japanese variety. Adapted to a wide variety of soils. Excellent in home orchard. Fruit dark mottled red. Very sweet and juicy.

Burbank. Trees not so vigorous as Abundance, but fruits keep better and ship in good condition when picked a few days before entirely ripe. Fruits dark yellow, mottled red. Flesh yellow, firm and tender.

Red June. Trees large and productive and remarkably free from disease. Color red with small russet dots. Flesh yellow, meaty and sweet, except near the seed. Excellent variety.

Shropshire. Best known Damson. Very vigorous, hardy and productive, often overladen with fruit. Color blue-black. Flesh golden yellow. Good variety if you are planting one tree or one thousand trees.

Wickson. One of the largest plums. Fruit red over yellow, flesh of amber yellow which is juicy, slightly coarse, firm and sweet. A very showy variety.

CHERRY.

	Each	Per 10	Per 100
2 to 3 feet_____	.40	\$3.50	\$30.00
3 to 4 feet_____	.45	4.00	35.00
4 to 5 feet_____	.50	4.50	40.00

Varieties:

Black Tartarian (Sweet). A widely planted sweet

cherry. Adapts itself to many different soils and climates. Fruits ripen early. Purplish red flesh that is sweet and juicy.

Dyehouse (Sour). Ripens a week earlier than Early Richmond. Fruits slightly smaller, color dark red. Flesh yellowish white with tart juice.

Early Richmond (Sour). The leading early sour cherry. Trees vigorous everywhere planted. Fruits dark red. Flesh pale yellow, tender and melting.

May Duke (Sour). This is one of the oldest and most widely planted varieties. Fruit early, color light to red. Flesh dark red with pleasing flavor.

Montmorency (Sour). The most popular sour cherry grown in America. It is surpassed by no other sour cherry in vigor and health. Fruit light to dark red. Flesh pale yellow, tinged with red; very juicy.

Gov. Wood (Sweet). A wonderful sweet cherry for home use. Trees bear early. Fruit large, yellowish-white tinted with crimson. Flesh tender, sweet and juicy.

APRICOT.

		Each	Per 10	Per 100
2 to 3 feet	-----	.25	\$2.25	\$20.00
3 to 4 feet	-----	.30	2.75	25.00

Varieties:

Early Golden. An early ripening variety of medium size. Skin smooth, pale orange color. Flesh yellow. Juicy and sweet, with good flavor.

Moorpark. Trees very large. Fruits of largest size and excellent in both appearance and quality. Color deep orange with distinct blush on side next to the sun. Flesh very firm, juicy and rich.

Royal. Tree large and vigorous. Regular in bearing with large crops. Fruit large yellow tinged with red. Flesh firm and juicy. Stone free.

QUINCE.

		Each	Per 10	Per 100
2 to 3 feet	-----	.25	\$2.25	\$20.00
3 to 4 feet	-----	.30	2.75	25.00

Varieties:

Champion. Tree vigorous and very productive. Fruit large. Flesh pale yellow, very firm and juicy. A good standard variety.

Orange. An early ripening variety, more adapted to the North. Color golden yellow. Flesh pale yellow becoming dark red when cooked. Quality good.

GRAPES.

	Each	Per 10	Per 100
1 year -----	.10	\$.90	\$ 8.00
2 year -----	.15	1.25	10.00

Varieties:

Concord. The most widely known grape in America. Very fruitful every year. Clusters uniform. Fruit black, firm and juicy.

Delaware. Next to Concord in popularity. Bears abundant crops of spicy red fruit. Very rot-resistant.

Moore's Early. Almost identical with Concord in fruiting habits and quality, except earlier to ripen.

Niagara. This is the leading green grape. Vines vigorous and productive. Not as hardy as Concord, but withstands sub-zero temperature. Bunch and berries slightly larger than Concord. Very tender and juicy.

Worden. A week or ten days earlier than Concord. Fruit of very high quality, large purplish black. Flesh green, very sweet and mild.

Scuppernong (Muscadine). This is a well known favorite in the South. They are usually trained on overhead trellises and need very little care after once started. The fruit is of a brownish color, very meaty, and has a pleasant sweetish taste.

	Each	Per 10	Per 100
Price -----	.35	\$3.25	\$30.00

4 to 5 feet-----	.25	2.25	20.00	175.00

*Gage Elberta, 5 cents per tree higher in all sizes.

Varieties:

Belle of Georgia. Fast growing, vigorous tree bearing large, creamy-white fruits, with crimson cheek. Flesh white, tinted red at pit. **Semi-cling.** Mid-season, July.

Carman. A very conspicuous, white peach, doing equally as well north or south. Fruit medium-sized popular shipping variety. Earlier than Belle of Georgia. Early July variety.

Champion. The standard white freestone. Trees very productive. Fruit very attractive, as well as good flavor. Late July.

Early Rose. An early ripening variety, often called second early. White semi-freestone peach. Good blush and excellent flavor for an early peach. Ripens mid-June.

South Haven. A fine hardy peach of the Elberta type, though it ripens about two weeks ahead of Elberta. It is a freestone peach with yellow meat and highly colored skin. It ripens over a period of near two weeks which makes it very fine for local marketing.

Hale Haven. Ripens about midway between Golden Jubilee and Elberta. Has the large size and round shape of the J. H. Hale, is a perfect freestone, and has a tough skin that makes it one of the best shipping varieties. Yellow fleshed and highly colored skin—these combined with its excellent shipping quality and large size, make it one of the very best for commercial planting. The tree is an excellent grower.

Early Crawford. Large, yellow variety of rich flavor. Tender flesh and very juicy. Ripens along with Belle of Georgia.

Early Elberta. Ripens about ten days before Elberta. More roundish and slightly sweeter.

Elberta. The standard yellow peach. Grows in every peach growing state. Gives good crops of well-formed fruit.

Golden Jubilee. An early, yellow, freestone peach, ripening from three to four weeks before Elberta. Very highly praised wherever grown, both as a market and home variety.

Hiley. A variety similar to Belle of Georgia, but ripens at least two weeks earlier. White with red cheek. White, juicy flesh. Good shipper.

J. H. Hale. A large, deep red peach with yellow flesh. Has practically no fuzz, and the strong flavor characteristic of Elberta is absent. Ripens in mid-July.

Gage Elberta. This comparatively recent introduction came from an Illinois orchard from a bud sport of Elberta, and in its years of trial has proven highly disease resistant. Tree has many characteristics of the Elberta, but is more spreading in habit of growth. Blooms come later than those of Elberta, and fruit ripens about 5 days after Elberta. On account of the tree getting height slowly in the nursery row, we must ask 5 cents extra per tree for all sizes of this variety. You will surely be pleased with Gage Elberta.

Late Elberta. Almost identical with Elberta, except ripens about ten days later. A good follow-up for Elberta.

Shippers Late Red. A splendid peach to follow Elberta which it follows by about one week. The fruit is large, colored red, with yellow flesh and freestone. Fruit is firm and ships well. A desirable variety.

Mayflower. Ripens earlier than any other peach. Trees hardy, and productive. Fruit medium, entirely covered with red. Ripens before June 1 in this section.

Red Bird. One of the best early peaches. Bright red color, with good flavor. Good commercial variety. Ripens in early June.

Rochester. One of the hardiest varieties. Largely grown in the Eastern states, but has proven a good variety almost everywhere planted. Fruit long pointed. Flesh yellow, stained red near seed.

Heath Cling. One of the old favorites. A late, white clingstone peach that keeps well when removed from tree. Excellent for cooking whole as stone gives no bad flavor. Ripens in September.

Krummel. A valuable peach where a late variety is wanted. Color light yellow, blushed with carmine. Flesh yellow, fine texture, juicy and somewhat acid.

BLACK RASPBERRY.

	Each	Per 10	Per 100
	\$.04	\$.30	\$ 2.50

Variety:

Cumberland. Very hardy and productive. A tall upright grower. Fruit large, glossy black. Flesh firm, juicy and sweet. Seeds small.

RED RASPBERRY.

	Each	Per 10	Per 100
	\$.06	\$.50	\$ 3.50

Chief. The most dependable early red raspberry. Considered by some superior to Latham. Fruit almost equal in size and quality to Latham.

Latham. One of the largest and most prolific reds. Very large, juicy fruit of excellent quality.

St. Regis. Ever-bearing variety. Gives crops of fruit throughout the summer. Fruit medium size, highly flavored.

Van Fleet. A thrifty grower of merit. Fruit large red and very showy.

BLACKBERRY.

	Each	Per 10	Per 100
	\$.05	\$.40	\$ 3.00

Varieties:

Early Harvest. One of the earliest varieties, very prolific. Good market variety.

Eldorado. Very vigorous and hardy. Berries very large and ripen together. Very sweet.

DEWBERRY.

	\$.06	\$.50	\$ 3.50
--	--------	--------	---------

Varieties:

Austin. A most productive market variety, bearing enormous crops of large berries at least a week before other varieties.

Lucretia. A very hardy variety, producing berries of extra size and quality. Very sweet and luscious.

GOOSEBERRY.

	Each	Per 10	Per 100
	\$.15	\$1.25	\$11.00

Varieties.

Downing. Very vigorous and productive. Fruit light green with distinctive veins. Juicy with fine flavor.

Houghton. Abundant bearer. Vigorous grower. Fruits dark red, sweet and juicy.

CURRANTS.

	\$.15	\$ 1.25	\$11.00
--	--------	---------	---------

London Market. Plants tall, upright and vigorous. Berries dark red.

Prince Albert. Vigorous, upright grower. Fruit very late. Sour and very highly flavored.

Wilder. A very popular commercial variety. Fruit grows in clusters. Red colored and exceptionally showy, as well as being of the highest quality.

STRAWBERRIES.

	Per 10	Per 100	Per 1000
Single crop -----	\$.15	\$.60	\$ 4.50
Everbearing -----	.30	1.25	9.00

Varieties. Single Crop.

Aroma. A mid-season variety that is very resistant to frost damage. Berries large, red clear through.

Blakemore. A good early berry that is fast replacing some of the early varieties. Fruit averages larger than other early varieties, and ships well.

Gandy. Last to ripen, and a fine berry.

Klondike. The standard shipping variety. Heavy bearer of firm red berries that ship in good condition.
